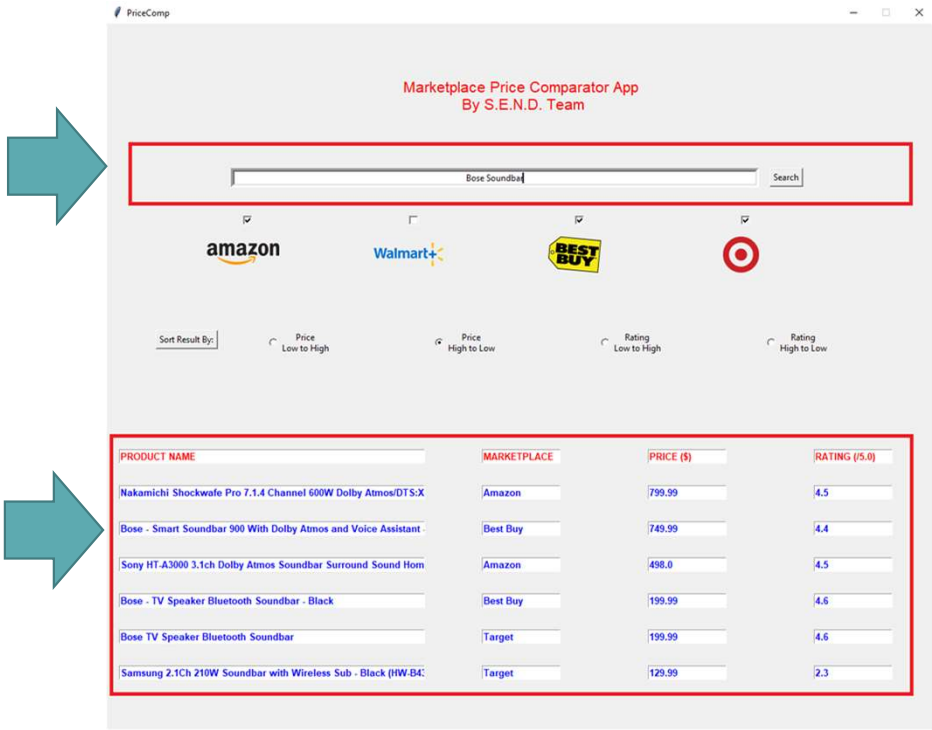
What is PriceComp App?

- eCommerce business is growing exponentially
- More and more choices of product and online marketplaces available
- More choices make consumer's product searching difficult
- PriceComp is designed to make consumer's product search journey easy
- PriceComp provides comprehensive platform to search and compare products across various eCommerce sites
- With a single click, provides all product data (e.g., price, rating) from various marketplaces

Main Features

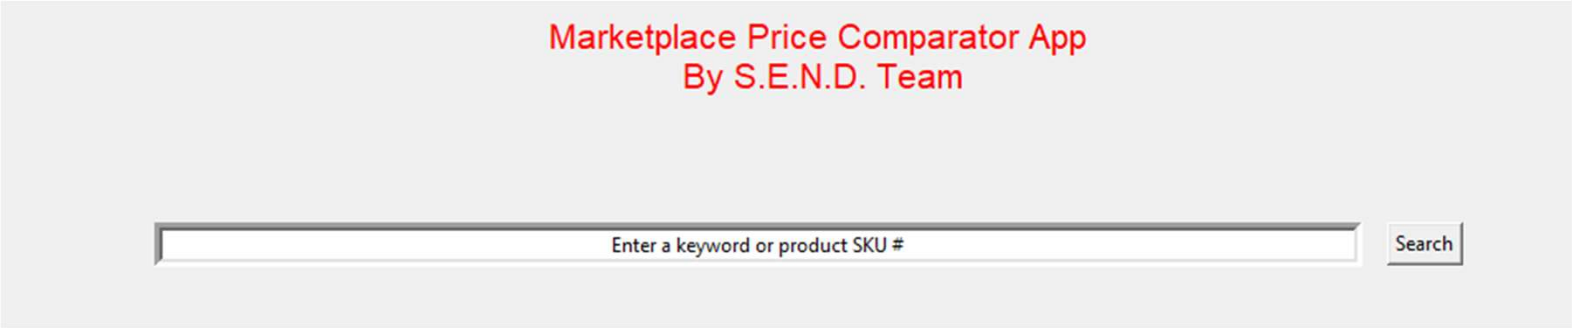
1. Search Product

1. Display Product Data



Main Features: Search Product

The main feature of the PriceComp app is to search the product on various marketplace sites (amazon.com, bestbuy.com, walmart.com and target.com)



Main Features: Display Product

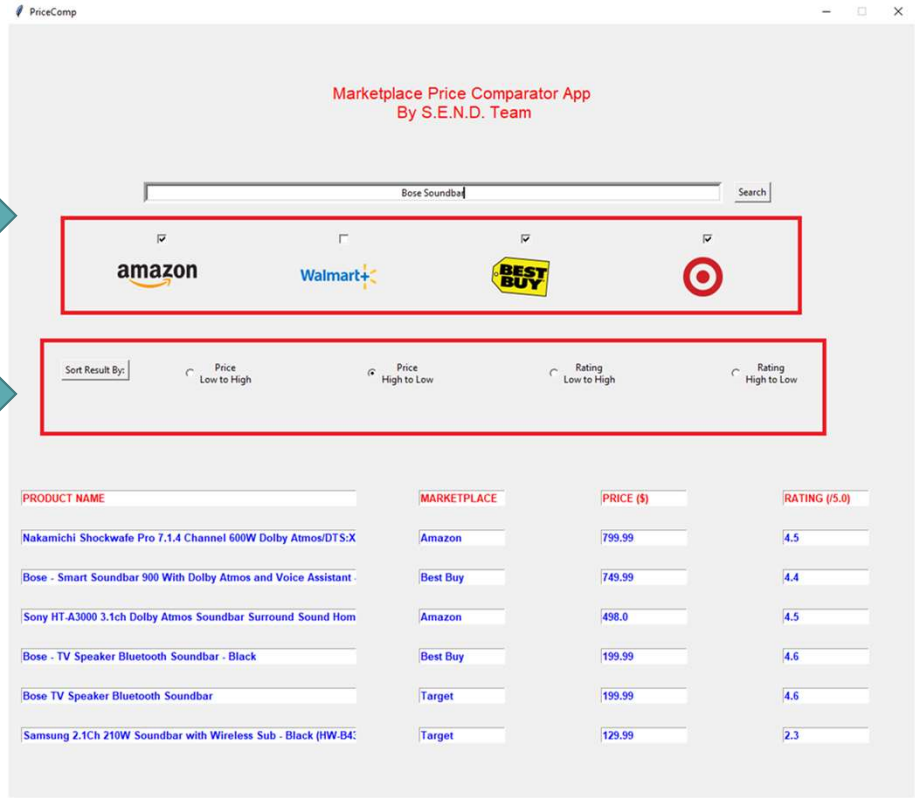
This user input is searched across the selected marketplace sites and the scraped product data will be displayed

PRODUCT NAME	MARKETPLACE	PRICE ($)	RATING (/5.0)
Bose Smart Soundbar 900 Dolby Atmos with Alexa Built-In, Blueto	Amazon	749.0	4.2
Bose Smart Soundbar 300 Bluetooth Connectivity with Alexa Voice	Amazon	399.0	4.5
Bose - TV Speaker Bluetooth Soundbar - Black	Best Buy	199.99	4.6
Bose - Smart Soundbar 900 With Dolby Atmos and Voice Assistant -	Best Buy	749.99	4.4
Bose Smart Soundbar 900 with Dolby Atmos and Voice Control - Bl	Target	749.99	4.5
Samsung 3.0Ch Soundbar with Built-in Woofer - Gray (HW-S50B)	Target	219.99	4.6

Addon Features

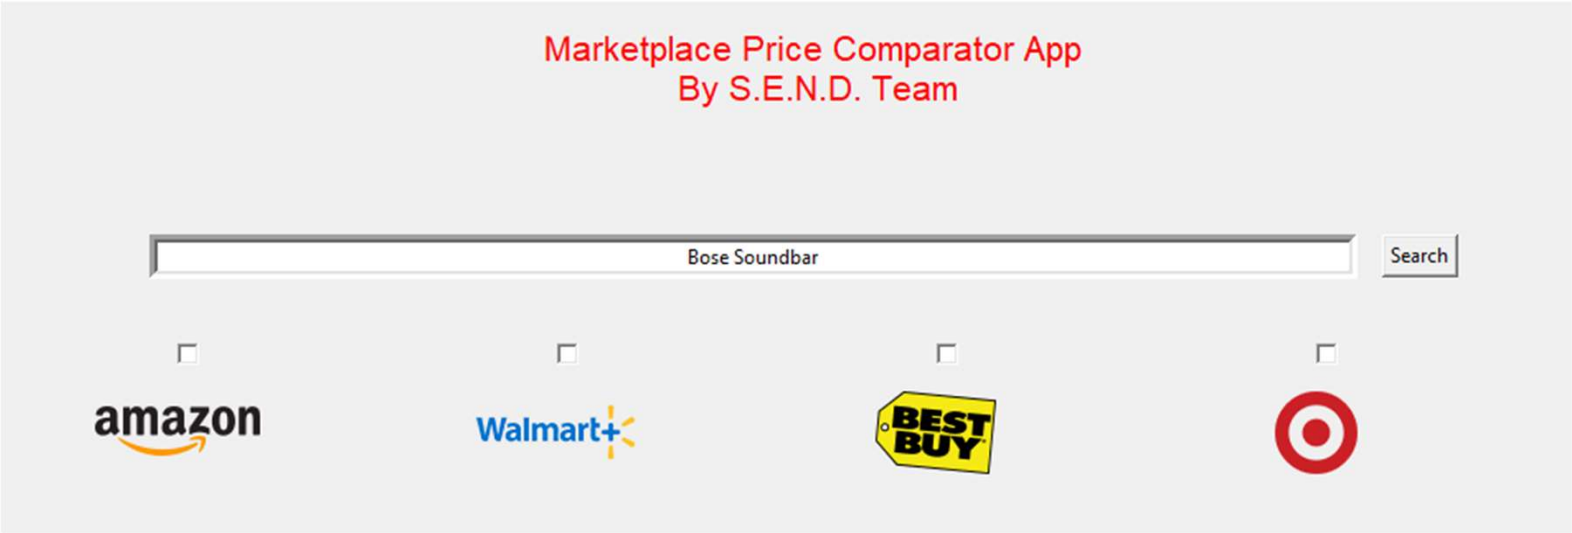
1. Select Marketplace Sites

1. Sort Search Results



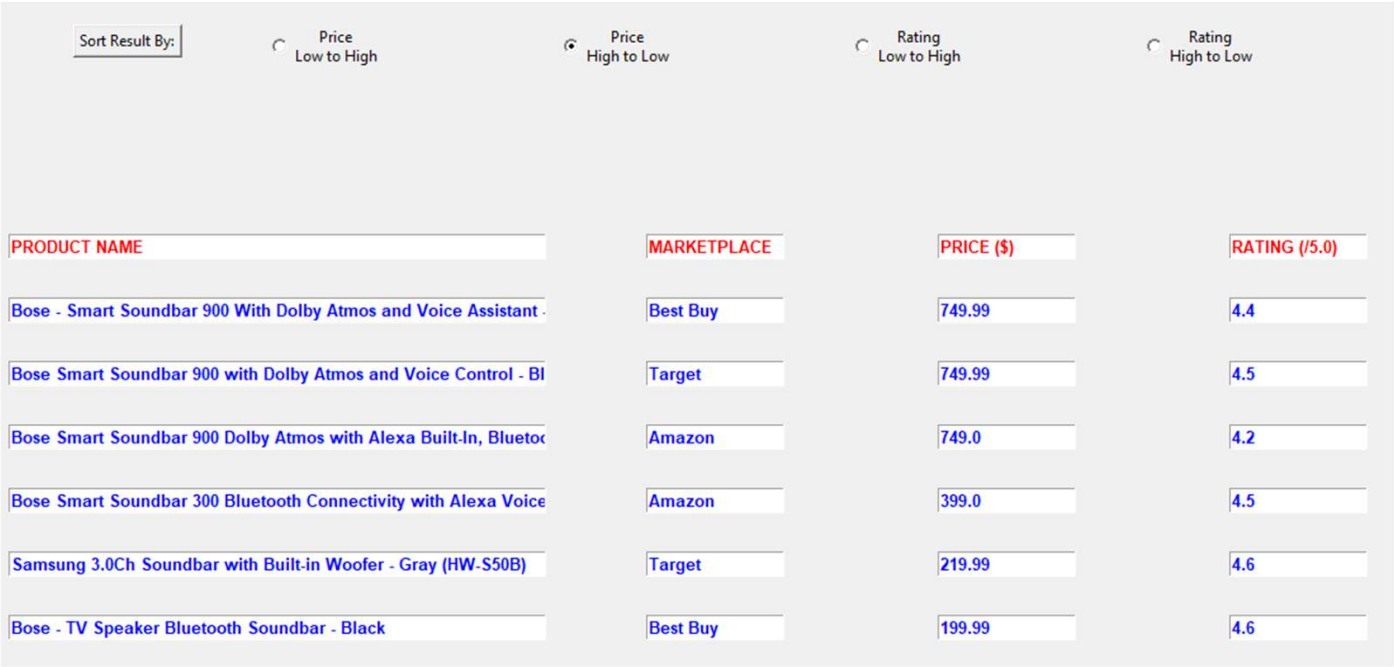
Addon Features: Select Marketplace Sites

PriceComp offers the user the ability to select from four different marketplace sites that they can search for their product: Amazon, Walmart, Best Buy, and Target



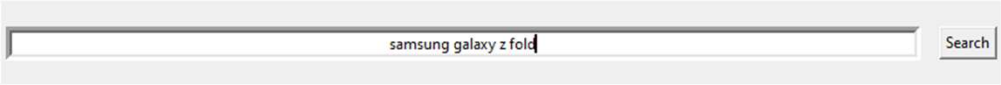
Addon Features: Sort Search Results

The user may want insight into the searched products in a way that isn't visible through the initial results, so a Sort function was added to our UI

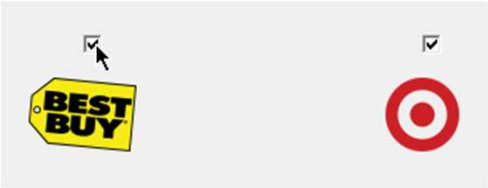


Main Scenario

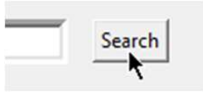
1. User enters the product keyword or SKU# in the search text box which is located on top of the UI window



2. After the search text is entered, as a next step, the user selects which marketplace sites they want to search the product



3. Once the user selects the marketplace sites, they click on the “Search” button which is located right next to the text box

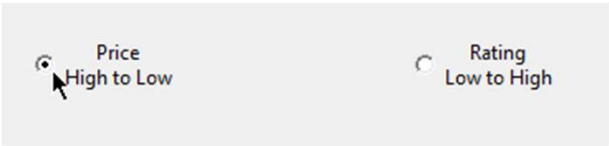


Main Scenario (contd.)

4. Once all the sites are searched and product data are collected, the data is displayed in tabulated form on the bottom of the UI window

PRODUCT NAME	MARKETPLACE	PRICE ($)	RATING (/5.0)
SAMSUNG Galaxy Z Fold 4 Cell Phone, Factory Unlocked Android	Amazon	1556.53	4.6
Fold Edition Galaxy Z Fold 4 Pen Replacement for Samsung Galax	Amazon	24.99	3.8
Samsung - Galaxy Z Fold4 256GB (Unlocked) - Phantom Black	Best Buy	1299.99	4.6
Samsung - Galaxy Z Fold4 1TB (Unlocked) - Phantom Black	Best Buy	1659.99	4.6
Samsung Galaxy Z Flip3 5G Unlocked (128GB)	Target	999.99	4.3

5. As an option, user can choose sort by option and clicks on “Sort Result By:” button



Product Technical Details

- PriceComp app is built on Python 3.10
- Works on Windows, Linux and MacOS
- Python Libraries used:

selenium
BeautifulSoup
tkinter
PIL (Python Imaging Library)
pandas
requests

- It requires chrome browser and chromedriver
- Some user configuration is required

Known Issues and Limitations

- Sometimes, keyword Search Results are not accurate
- walmart.com scraping not working
- Selection of marketplace sites is mandatory

Product Support

- For any question or product support, reach out to any of the S.E.N.D team members:

Nayan Patel (nayanpat@umich.edu)

Steve Anderau (standera@umich.edu)

Ethan Pellegrini (epellegr@umich.edu)

Dheeraj Mohanbabu (dheerajm@umich.edu)

Thank you for using PriceComp
We Hope You Enjoyed it ☺
